Labbiah – What we need for the Play Store launch

Oct 1, 2026 · @Maarij Bukhari

The app is built and ready to upload. These are the items only you can provide before Google will publish it. Reply with each one, or tick them off below as you send them.

Contact details

Item	What we need
Support email	Shown publicly on the store page. Use a shared inbox you check, e.g. support@yourdomain.
Phone number	Contact number for the store page, so users and Google can reach you.
Website	Optional, but strongly recommended. It is also the easiest place to host the privacy policy.

Legal and policy

Item	What we need
Privacy policy URL	A public web page, not a PDF. It must say the app reads contacts and places calls, and that nothing leaves the phone. We can draft the text if you can host it.
Who the app is for	One line confirming it's for elderly or low-vision users. Google only allows the Volume-Up quick switch for apps that support people with accessibility needs.
Data handling sign-off	Confirm the app collects no personal data and has no ads, analytics or accounts. We fill in Google's Data Safety form from this.
Countries	Where it should be available, e.g. Saudi Arabia only, the Gulf, or worldwide.

Item	What we need
Price	Free or paid. A free app can't be made paid later.

Store listing

We can write the descriptions and take screenshots ourselves; tell us if you'd rather supply them.

Item	What we need
App name	The name on the store, up to 30 characters, in English and Arabic. Currently "Labbiah".
Short description	One line, up to 80 characters, in English and Arabic.
Full description	Up to 4,000 characters per language. A few bullet points about who it's for and what it does is enough for us to write it.
App icon	The logo as a square, 512 × 512 px PNG. The current logo is wide, so we need a square version or your OK to make one.
Feature graphic	Banner at the top of the store page, 1024 × 500 px. Optional if we design it from the logo.
Screenshots	At least 2 phone screenshots. We can take these from the app.
Category	Probably Tools or Lifestyle. Your call.

Checklist

The privacy policy holds everything else up, so please send that first.

- [ ] Privacy policy page live, URL sent
- [ ] Support email and phone number
- [ ] Website (optional)
- [ ] Confirmation of who the app is for and that no data is collected
- [ ] Countries and price
- [ ] Square logo for the icon, or OK to make one
- [ ] Notes for the store description, or OK for us to write it
